The primary function of the SHAPE Drops is to balance brain chemistry by improving communication between the hypothalamus and pituitary gland. These two areas of the brain work together to send signals to the rest of your body.

Miscommunication between the hypothalamus and pituitary gland can lead to hormone imbalances, PMS, early menopause, low testosterone in men, anxiety, depression, hypothyroid, hypoglycemia, diabetes and other inflammatory conditions.

The SHAPE Drops support proper communication to alleviate these symptoms and provide whole body support. These benefits are significantly enhanced when the SHAPE Drops are combined with the SHAPE Nutrition Protocol in the SHAPE Program.

If weight loss is one of your goals, the SHAPE Drops help your body release excess body fat and burn it as calories or energy, as well as balance appetite. Without SHAPE Drops, the program isn't as effective over the long term.

We chose each ingredient in our SHAPE Drops for a specific purpose to support you during your SHAPE journey.

Nanomolecular Ingredient

Lyophilized pituitary bovine gland, hypothalamus bovine gland, placenta ovine

Sodium phosphate

Sodium chloride

Potassium phosphate

Nutritionally Supportive Function

Supports neurological and hormonal systems, maximizing metabolic function. "Lyophilized" means freeze-dried.

Helps to balance pH, which helps with mineral balance and distribution and proper hydration.

Helps with fluid balance, constipation and water retention.

Assists with sleep, mood, exhaustion and dizziness.

Magnesium phosphate	Decreases muscle cramping.
Calcium carbonate	Supports pituitary and thyroid function, helps eliminate belly fat, provides whole body support.
CoQ10	Supports energy production at a cellular level.
Strychnine tree seed	Aids digestion, especially after overindulgence; helps with liver/gallbladder function.
Graphite	Supports anyone with a tendency toward obesity, chronic constipation, dry/cracked skin or excessive hunger.
Club moss	Supports liver/gallbladder function; relieves gas, bloating and indigestion.
Greater celandine root	Supports gallbladder and fat metabolism.
Activated charcoal	Supports removal of toxins.
Bladderwrack	Supports thyroid, boosts metabolism.
Pokeweed root	Helps to suppress appetite and reduce cravings.
Chasteberry	Supports hormone balance and function.
Star of Bethlehem (Bach Flower Remedy)	Assists with the emotional aftereffects of trauma.
Mustard (Bach Flower Remedy)	Helpful when one feels deep gloom for unknown reasons.
Oak (Bach Flower Remedy)	Helps make one "sturdy," strong in adversity or able to let go.
Goldenrod	Helps reduce pain and swelling; may have a diuretic effect; helps stop muscle spasms; provides herbal nutritional support for gout, joint pain, arthritis, eczema and other skin conditions.
Berberine root bark, Oregon grape root, Chinese goldthread root	Offers antibacterial, anti-inflammatory and immune-enhancing properties; supports blood purification, kidney function and blood sugar metabolism.
Amino acids: arginine, cysteine, leucine, proline, serine, threonine, valine	Supports energy production, metabolism, blood sugar and digestion.

SHAPE Drops use only the highest quality, organic and wildcrafted raw materials. They are safe, effective and hormone-free, and we do not use any synthetic fillers, binders, corn ethanol, preservatives or color stabilizers. Because of the pure nature of this product, some color and taste

variation is normal, even within the same batch. The product is still safe and effective.

What is nanomolecular nutrition?

You may notice on the label, it states that the SHAPE Drops are a “Nanomolecular Dietary Supplement.” Nanomolecular nutrition is the science of using small amounts of natural materials to target the root of a problem and stimulate the body’s inherent ability to heal — physically, mentally and emotionally.

Western science has been marching toward the discovery of increasingly smaller particles of matter for centuries — from molecules and atoms to subatomic particles, such as quarks. ‘Nanomolecular’ refers to the manipulation of individual molecules. Therefore, a nanodose is literally a dose that can be measured in molecules. Nanomolecular nutrition is bioavailable, can pass easily through cell membranes and the blood-brain barrier and are generally safer and more effective than large doses of the same substance. This is in large part due to the nanodoses’ minute size.

You might be wondering, if the doses are so small, how can they have any effect? With nanomolecular nutrition, it’s not just about the quantity; it’s also about the *potency*. The process of creating nanomolecular nutritional formulas produces a final product that can be more potent than even an herbal extract. This process allows you to take less of a given substance while getting a greater benefit. In other words, if you were to take a regular dose of each of the ingredients listed above, you’d be taking 50 pills a day, but the pills wouldn’t work as well.

For instance, with chasteberry, both the whole plant version and nanodose help with hormone balance, but the nanodose is likely far better absorbed and utilized. With the ingredient [strychnine](#), the whole plant version of can cause diarrhea and vomiting, but a nanodose of strychnine can actually alleviate or prevent diarrhea and vomiting. Nanomolecular strychnine is a common remedy for food poisoning and upset stomach in children and adults.

The efficacy of nanodoses has been scientifically validated through controlled clinical studies, epidemiological data, clinical outcome trials and historical review of the field. Our unique SHAPE Drops formula is based on decades of research and has been proven effective across thousands of patients [since 2010](#).

Do SHAPE Drops ever expire?

The SHAPE Drops do not expire and will maintain their potency over time because they are in a base of organic cane alcohol. Be sure to keep the lid tightly on the bottle as alcohol evaporates quickly.

On the bottom of your bottle, you will see "LOT" and 5-6 numbers. This is a lot number, or an identification number for manufacturing purposes. Under the lot number, you will see "MFG" and a date. "MFG" stands for "Manufacturing." The date that follows is the month and year that bottle was manufactured.

Directions: 0.50 ml three times daily directly under the tongue or as recommended by your healthcare practitioner. Avoid eating or drinking 15 minutes before or after taking drops.

To avoid external contamination, do not touch dropper to lips, teeth or tongue. Always keep closed when not in use.

Warnings: Do not use if seal is missing or broken; seek professional counsel if pregnant or nursing; keep out of reach of children.

This product does not contain wheat, yeast, gluten, eggs, dairy, soy, corn, artificial colors, flavors, or toxic preservatives.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, cure, treat or prevent any disease.
